| Diameter          | 1/4"                                                                                                                        |
| Length            | 1,000'                                                                                                                      |
| Rope Construction | Solid Braid                                                                                                                 |
| Color             | White                                                                                                                       |
| Product Weight    | 18.4 lbs.                                                                                                                   |
| Additional Info   | WLL is generally 5-20% of the tensile strength, depending on the age and condition of the rope. Tensile strength: 1,300 lbs |

SAFETY INFORMATION

- Never exceed the Working Load Limit (WLL). The WLL is the maximum load the product is rated to handle in service.
- Inspect before every use. Remove from service if cut, worn, abraded, stretched, cracked, bent, corroded, heat-damaged or missing its identification tag or marking.
- Protect webbing, rope and chain from sharp edges and corners with edge protection.
- Cargo securement on commercial vehicles must meet FMCSA 49 CFR Part 393, Subpart I (aggregate WLL and minimum tie-down rules).
